

Midlands STEM Institute School Wellness Policy

Issued 6/17

Midlands STEM Institute recognizes that student wellness and proper nutrition are related to students' physical well-being, growth, development, and readiness to learn. Midlands STEM Institute is committed to providing a school environment that promotes student wellness, proper nutrition, nutrition education, and regular and physical activity as part of the total learning experience. In a healthy school environment, students will learn about and participate in positive dietary and lifestyle practices.

Food and Beverage Availability

Midlands STEM Institute is committed to serving healthy meals to students, with plenty of fruits, vegetables, whole grains, and fat-free and low-fat milk that are moderate in sodium, low in saturated fat, and have zero grams trans-fat per serving (nutrition label or manufacturer's specification); and to meeting the nutrition needs of school children within their calorie requirements. The school meal programs aim to improve the diet and health of school children, help mitigate childhood obesity, model healthy eating to support the development of lifelong healthy eating patterns, and support healthy choices while accommodating cultural food preferences and special dietary needs.

Midlands STEM Institute participates in USDA child nutrition program National School Lunch Program (NSLP) and the School Breakfast Program (SBP) and are committed to offering school meals that:

- are accessible to all students
- are appealing and attractive to children
- are served in clean and pleasant settings
- meet or exceed current nutrition requirements established by local, state, and federal statutes and regulations

Students in grades K through sixth grade will be provided a minimum of 20 minutes to consume lunch after they have received their food.

Midlands STEM Institute does not use foods or beverages as rewards for academic performance or good behavior. Additionally, Midlands STEM Institute will not withhold food or beverages as punishment. Teachers are provided with a list of alternative ideas for behavior management.

Water

To promote hydration, free, safe, unflavored drinking water will be available to all students throughout the school day. Midlands STEM Institute will make drinking water available where school meals are served during mealtimes.

Competitive foods and beverages

Midlands STEM Institute is committed to ensuring that all foods and beverages available to students on school campus during the school day support healthy eating. Midlands STEM Institute will establish standards for foods made available, but not sold, during the school day on school campus. All foods that meet the competitive food standards may be sold at fundraisers on the school campus during school hours. The number of fundraisers exempt from the nutrition requirements will be determined by the State Board of Education.

Midlands STEM Institute Goals for Health and Wellness

Nutrition promotion

Nutrition promotion and education positively influence lifelong eating behaviors by using evidence-based techniques and nutrition messages and by creating food environments that encourage healthy nutrition choices and encourage participation in school meal programs. Students and staff will receive consistent nutrition messages throughout the school, classrooms, gymnasiums, and cafeterias. Nutrition promotion also includes marketing and advertising nutritious foods and beverages to students and is most effective when implemented consistently through a comprehensive and multi-channel approach by school staff, teachers, parents/legal guardians, students, and the community. Midlands STEM Institute will promote healthy food and beverage choices for all students throughout the school campus and will encourage participation in school meal programs. This promotion will occur through the use of evidence-based healthy food promotion techniques through the school meal programs using Smarter Lunchroom techniques and through adherence to a policy of 100 percent of foods and beverages promoted to students meeting the USDA Smart Snacks in School nutrition standards.

Nutrition education

Midlands STEM Institute will teach, model, encourage, and support healthy eating by all students. The school will provide nutrition education and engage in nutrition promotion that fulfills the following criteria:

- fosters the adoption and maintenance of healthy eating behaviors such as acquiring skills for reading food labels and menu planning
- is part of a sequential comprehensive standards-based health education program designed to provide students with the knowledge and skills necessary to promote and protect their health
- promotes fruits, vegetables, whole-grain products, low-fat and fat-free dairy products, and healthy food preparation methods
- emphasizes caloric balance between food intake and energy expenditure (promotes physical activity/exercise)
- links with school meal programs, cafeteria nutrition promotion activities, school gardens, Farm to School programs, and other school food and nutrition-related

- community services
- aches media literacy with an emphasis on food and beverage marketing includes nutrition education training for teachers and other staff
- Teachers media literacy with an emphasis on food and beverage marketing
- Includes nutrition education training for teachers and other staff

Physical activity

Children and adolescents should participate in at least 60 minutes of physical activity every day. A substantial percentage of students' physical activity can be provided through a comprehensive school physical activity program which includes quality physical education as the foundation; physical activity before, during, and after school; staff involvement; and family and community engagement. Midlands STEM Institute may promote opportunities for physical activity via in-school announcements, newsletters, posters, etc. Midlands STEM Institute is committed to providing these opportunities, and will ensure that these varied physical activity opportunities are in addition to, and not as a substitute for, physical education.

Midlands STEM Institute encourages the use of physical activity as a reward when feasible. Physical activity during the school day (including, but not limited to, recess, classroom physical activity breaks, and/or physical education) will not be withheld as punishment for any reason. **This does not include participation on sports teams or with other sports-related after school activities, nor does it include participation on sports teams with specific academic requirements.**

Physical education

Midlands STEM Institute will provide students with physical education using an age appropriate, sequential physical education curriculum consistent with national and state standards for physical education. The physical education curriculum will promote the benefits of a physically active lifestyle and will help students develop skills to engage in lifelong healthy habits and incorporate essential health education concepts. The curriculum will support the essential components of physical education. All students will be provided equal opportunities to participate in physical education classes. Midlands STEM Institute will make appropriate accommodations to allow for equitable participation for all students and will adapt physical education classes and equipment as necessary.

Midlands STEM Institute will integrate wellness activities across the entire school setting, not just in the cafeteria, other food and beverage venues, and physical activity facilities. Midlands STEM Institute will coordinate and integrate other initiatives related to physical activity, physical education, nutrition, and other wellness components so all efforts are complementary and work towards the same set of goals and objectives promoting student well-being, optimal development, and strong educational outcomes.

Midlands STEM Institute will coordinate content across curricular areas that promote

student health, such as teaching nutrition concepts in mathematics, provided by either the school or Midlands STEM Institute's curriculum specialists.

All efforts related to obtaining federal, state, or association recognition for efforts or grants/funding opportunities for healthy school environments will be coordinated with and complementary of the wellness policy including, but not limited to, ensuring the involvement of Midlands STEM Institute wellness committee.

All school-sponsored events will adhere to the wellness policy guidelines. All school sponsored wellness events will include physical activity and healthy eating opportunities when appropriate.

Community partnerships

Midlands STEM Institute will develop and enhance relationships with community partners (e.g., hospitals, universities/colleges, local businesses, SNAP-Ed providers and coordinators) in support of this wellness policy's implementation. Existing and new community partnerships and sponsorships will be evaluated to ensure that they are consistent with the wellness policy and its goals.

Community health promotion and family engagement

Midlands STEM Institute will promote to parents/legal guardians, families, and the general community the benefits of and approaches for healthy eating and physical activity throughout the school year. Families will be informed and invited to participate in school sponsored activities and will receive information about health promotion efforts. Midlands STEM Institute will use electronic mechanisms (e.g., email or displaying notices on Midlands STEM Institute's website), as well as non-electronic mechanisms, (e.g., newsletters, presentations to parents/legal guardians, open house registrations, or sending information home to parents/legal guardians), to ensure that all families are actively notified of opportunities to participate in school-sponsored activities and receive information about health promotion efforts.

Staff wellness and health promotion

Midlands STEM Institute's wellness committee will implement strategies to support staff in actively promoting and modeling healthy eating and physical activity behaviors.

Professional learning

Midlands STEM Institute follows the USDA Professional Standards for State and Local Nutrition Programs to ensure professional development in the area of food and nutrition is provided for all food service employees, including directors, coordinators, managers, and staff.

When feasible, Midlands STEM Institute will offer annual professional learning

opportunities and resources for non-food services staff to increase knowledge and skills about promoting healthy behaviors in the classroom and the school (e.g., increasing the use of kinesthetic teaching approaches or incorporating nutrition lessons into math class). Professional learning will help Midlands STEM Institute faculty and staff understand the connections between academics and health and the ways in which health and wellness are integrated into ongoing reform or academic improvement plans efforts and plans.

District Wellness Committee/Coordinated District Health Advisory Council

Midlands STEM Institute's wellness committee will convene at least annually to establish district wellness goals and to oversee school health and safety policies and programs including development, implementation, and periodic review and update of the wellness policy. Wellness committee members will include, to the extent possible, parents/legal guardians, students, representatives of the school's nutrition services, physical education teachers, school health professionals, the school board, school administrators, and the general public. The designated officer for ensuring district compliance with the wellness policy and oversight of the committee will be the child nutrition program supervisor. The supervisor can be reached at (803) 815-1524.

Midlands STEM Institute will notify the public annually regarding the content and implementation of the wellness policy and share any updates to the policy. Midlands STEM Institute will also publicize the name and contact information of the child nutrition program coordinator and with information on how the public can become involved with the wellness committee or obtain additional information on the wellness policy. The information for this annual review can be gathered through and utilized in Midlands STEM Institute's website or in via printed information at the school.

Every three years, Midlands STEM Institute will assess its compliance with the policy, how it compares to model wellness policies published by state and federal agencies, and Midlands STEM Institute's progress in attaining the goals of the policy. The results of this assessment will be made available to the public to showcase the wellness efforts being made by Midlands STEM Institute and how the school is in compliance with the wellness policy. Following this assessment, Midlands STEM Institute will update or modify the policy as necessary and share these changes with the public.

Recordkeeping

Midlands STEM Institute will retain records to document compliance with the requirements of the wellness policy. Documentation maintained by Midlands STEM Institute will include, but will not be limited to, the following:

- the written wellness policy
- documentation demonstrating that the policy has been made available to the public
- documentation of efforts to review and update the policy, including an indication of who is involved in the update and methods Midlands STEM Institute uses to make committee (e.g., copy of meeting notice posted on Midlands STEM Institute

- website)
- documentation to demonstrate compliance with the annual public notification requirements
 - the most recent assessment on the implementation of the wellness policy
 - documentation demonstrating the most recent assessment on the implementation of the wellness policy has been made available to the public

Food and Beverage Marketing

Midlands STEM Institute is committed to providing a school environment that ensures opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. Midlands STEM Institute strives to teach students how to make informed choices about nutrition, health, and physical activity. These efforts will be weakened if students are subjected to advertising on district property that contains messages inconsistent with the health information Midlands STEM Institute is imparting through nutrition education and health promotion efforts. It is the intent of the school to protect and promote students' health by permitting advertising and marketing for only those foods and beverages that are permitted to be sold on the school campus, consistent with Midlands STEM Institute's wellness policy.

Any foods and beverages marketed or promoted to students on school campuses during the school day will meet or exceed the USDA Smart Snacks in School nutrition standards such that only those foods that comply with or exceed those nutrition standards are permitted to be marketed or promoted to students. These standards do not apply to marketing that occurs at events outside of school hours, such as after school sporting events or any other events, including school fundraisers

Contracts for goods or services that include a food and beverage marketing component executed after June 30, 2017, must conform to federal nutrition standards. No exceptions will be granted.

Food and beverage marketing is defined as advertising and other promotions in the school. Food and beverage marketing includes any oral, written, or graphic statements made for the purpose of promoting the sale of a food or beverage product made by the producer, manufacturer, seller, or any other entity with a commercial interest in the product. This term includes, but is not limited to the following:

- brand names, trademarks, logos, or tags, except when placed on a physically present food or beverage product or its container
- displays, such as on vending machine exteriors
- corporate brand, logo, name, or trademark on school equipment that is displayed during the school day, such as marquees, message boards, scoreboards, or backboards **(Note: Immediate replacement of these items is not required; however, Midlands STEM Institute will replace or update scoreboards or other durable equipment when existing contracts are up for renewal or to**

the extent that is in financially possible over time so that items are in compliance with this policy.)

- corporate brand, logo, name, or trademark on cups used for beverage dispensing, menu boards, coolers, trash cans, and other food service equipment, as well as on posters, book covers, pupil assignment books, or school supplies displayed, distributed, offered, or sold by Midlands STEM Institute
- advertisements in school publications or school mailings
- free product samples, taste tests, or coupons of a product, or free samples displaying advertising of a product
